Home: 347/A Dhole Patil Road, Shiv Kailash Building Behind Hotel Meru, 411001
Pune (India)

ABOUT ME

A passionate Software Engineer with expertise in AI/ML, full-stack development, and cloud computing. Skilled in Next.js, Node.js, AWS, and Firebase, with experience in system architecture and DevOps. Successfully created and optimized enterprise applications for scalability and security. Always eager to learn, innovate, and solve complex technical challenges.

EDUCATION AND TRAINING

Secondary School Certificate

SSPM Day School And Jr.College [04/05/2013 – 31/05/2019]

City: Pune | **Country:** India | **Website:** <http://www.sspmdayschool.org/> | **Field(s) of study:** Natural sciences, mathematics and statistics: • Physics • Biology • Mathematics • Statistics ; Information and Communication Technologies: • Database and network design and administration • Computer use

Higher Secondary Certificate

AISSMS Shri Shivaji Preparatory Military School (SSPM) [15/07/2019 – 31/05/2021]

City: Pune | **Country:** India | **Website:** <https://sspms.in/> | **Field(s) of study:** Business, administration and law: • Business and administration not further defined • Accounting and taxation | **Level in EQF:** EQF level 4

Bachelors of Computer Applications

MIT ADT University Loni [30/09/2022 – Current]

City: Pune | **Country:** India | **Field(s) of study:** Information and Communication Technologies: • Software and applications development and analysis • Information and Communication Technologies (ICTs) not further defined • Inter-disciplinary programmes and qualifications involving Information and Communication Technologies (ICTs) | **Level in EQF:** EQF level 5

LANGUAGE SKILLS

Mother tongue(s): Marathi

Other language(s):

German

LISTENING A1 **READING** A1 **WRITING** A1

SPOKEN PRODUCTION A1 **SPOKEN INTERACTION** A1

Hindi

LISTENING C1 **READING** C1 **WRITING** C1

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1

English

LISTENING B2 **READING** B2 **WRITING** B2

SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** C1

SKILLS

Languages

python / java / javascript / Typescript / c++ / c / SQL

Frontend

HTML5 / next.js / React.js / CSS3 / Tailwind CSS

Backend

Node.js / Express.js / Firebase Functions

Cloud & DevOps

AWS / Vercel / CI/CD / Docker / Firebase

Databases

MongoDB / SQLite / Firestore

AI/ML & Tools

OpenAI API / NLP / REST APIs / JSON

Version Control & Collab

WebRTC / Socket.io / Jitsi / Git / Github

PROJECTS

[10/04/2025 – 15/04/2025]

Weather App

Tech Stack: Python, REST APIs (OpenWeatherMap), JSON

Description:

Developed a command-line weather forecasting tool that retrieves and displays real-time weather data (temperature, humidity, and condition) for user-specified cities using OpenWeatherMap's REST API. Implemented JSON parsing, API error handling, and modular function design for cleaner code.

Highlights:

Learned API integration and handling external data formats

Applied best practices for user input validation and error handling

Potential for GUI extension using Tkinter or deployment as a Flask web app

[04/05/2025 – 12/05/2025]

Simple Chatbot

Tech Stack: Python

Description:

Created a rule-based chatbot that responds to greetings, questions, and predefined keywords. Used dictionaries and conditionals to drive conversational flow.

Highlights:

Practiced text parsing and conversational logic

Structured chatbot responses for common queries

Foundation for further development with NLP libraries (e.g., NLTK, spaCy)

[10/03/2025 – 21/03/2025]

Personal Expense Tracker

Tech Stack: Python, SQLite, CSV, Matplotlib (optional)

Description:

Created a CLI-based application to manage personal finance records. Implemented features to log expenses, view total spend by category, and generate basic monthly reports. Used SQLite for persistent storage and optionally added data visualization using Matplotlib.

Highlights:

Practiced database CRUD operations

Gained experience with file handling and command-line interfaces

Built logic to calculate monthly savings, categorize expenses, and generate summaries

[28/05/2025 – Current]

CodeConnect – Collaborative Coding Showcase & Hiring Platform

Tech Stack: React.js, Next.js, React Native (Expo), Firebase, Node.js, OpenAI API, MongoDB/Firestore, WebRTC, Socket.io, Tailwind CSS

Project Overview

Developed **CodeConnect**, a full-stack web and mobile platform enabling **students to showcase coding projects**, receive **AI-based reviews**, and connect with **companies, professors, and mentors** for feedback, internships, and career opportunities.

Key Features

- **Portfolio & Project Upload:** Students can upload GitHub links, code, tech stacks, and demos with rich UI and public profiles.
- **AI Integration:**
 - Automated project review using OpenAI (code quality, suggestions)
 - Resume analysis and scoring with GPT-based feedback
- **Live Collaboration Rooms:** Real-time video chat and code-sharing for mentoring, interviews, or group study (WebRTC + Jitsi).
- **Notifications & Email Alerts:** Custom alerts for project reviews, job invites, and mentor messages via Firebase Cloud Messaging.
- **Internship/Job Portal:** AI-powered job matching based on user skills, GitHub activity, and portfolio relevance.
- **Mobile App:** Built using React Native & Expo, fully synced with web features and Firebase backend.

Responsibilities

- Designed and implemented frontend UI with **Next.js** and **Tailwind CSS** for modern, responsive interfaces.
- Developed backend APIs in **Node.js/Express**, integrated with **Firestore** and **OpenAI APIs**.
- Built cross-platform **mobile app using React Native**, enabling full feature parity with web.
- Integrated real-time chat & video using **Socket.io** and **WebRTC**.
- Configured CI/CD pipelines with **Vercel**, Firebase Hosting, and Expo.

Impact

- Enabled real-time collaboration and peer learning among students and mentors.
- Improved portfolio visibility and hiring chances through AI feedback.
- Created a unified platform that bridges the gap between learning, showcasing, and employment.
